

WELDMARK®

70S6 MIG WIRE

THE HIGHEST QUALITY MIG WIRE AT THIS PRICE POINT

Our 70S6 MIG Wire is manufactured by Blue Demon exclusively for Weldmark. 70S6 is a mild steel welding wire that contains higher levels of manganese and silicon than other standard grades of MIG wire to produce high quality welds when used on dirty, oily, or rusty steel. The high silicon content increases the fluidity of the weld pool, thus creating a smoother bead appearance and resulting in minimal post-weld grinding. This wire is engineered to provide porosity-free, x-ray quality welds at the highest tensile strength (as welded) of all the plain carbon steel wires.
